

ecoprolog: List of Publications

Last update: February 2012

Detailed and cost-free extracts for the market reports mentioned below, as well as information on further reports are available at www.ecoprolog.com

Energy Industry

The Market for Coal Power Plants in Europe 2012/2013

Analysis of the European operator and plant market for coal power plants. Description of more than 330 coal power plants with around 900 coal power plant units including technical and operational data. Evaluation of planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers as well as economical, technical and operational trends.

Biofuels in Europe - The European Market for Biofuel Plants 2012/2013

Analysis of the European operator and plant market for biofuel plants. Description of more than 380 biofuel plants including technical and operational data. Evaluation of planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers as well as economical, technical and operational trends.

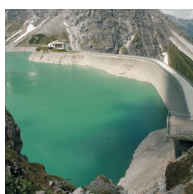

The Market for Gas Power Plants in Europe 2011/2012

Analysis of the European operator and plant market for gas power plants. Description of more than 470 gas power plants with around 850 gas power plant units including technical and operational data. Evaluation of planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers as well as economical, technical and operational trends.

Biomass to Energy 2011/2012 - The Worldwide Market for Biomass Power Plants

Analysis of the worldwide operator and plant market for biomass power plants. Description of more than 1,800 plants including technical and operational data. Evaluation of more than 600 planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers, national legislations and technical and operational trends.

The European Market for Pumped-storage Power Plants 2011/2012

Analysis of the European operator and plant market for pumped-storage power plants. Description of more than 170 plants including technical and operational data. Evaluation of planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers as well as economical, technical and operational trends.

Waste to Energy 2011/2012 - The Worldwide Market for Waste Incineration Plants

Analysis of the worldwide operator and plant market for wte plants. Description of more than 1,000 plants including technical and operational data. Evaluation of planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers, national legislations and technical and operational trends.

Energy Industry (Continuation)

The Market for Biogas Plants in Europe

Analysis of the European operator and plant market biogas power plants. Description of more than 1,300 plants with an installed electrical capacity of 500 kw or more. Evaluation of planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers, national legislations and technical and operational trends.

The Market for Concessions of Electricity Grids in Germany

Analysis of the German market for concessions for electricity grids. Description and summary of more than 4,800 contracts on a municipal basis. Estimation of the development of the award of concessions for every federal state and a national forecast within the next 5 years. Details on all ca. 860 distribution grid operators in Germany with the main structure characteristics of the grids. Competition analysis of the involved electric power companies.

The Market for Concessions of Gas Grids in Germany

Analysis of the German market for concessions for gas grids. Description and summary of more than 2,500 contracts on a municipal basis. Estimation of the development of the award of concessions for every federal state and a national forecast within the next 5 years. Details on all ca. 690 distribution grid operators in Germany with the main structure characteristics of the grids. Competition analysis of the involved energy companies.

Waste Industry

Waste to Energy 2011/2012 - The Worldwide Market for Waste Incineration Plants

Analysis of the worldwide operator and plant market for wte plants. Description of more than 1,000 plants including technical and operational data. Evaluation of planned and approved plants and plants under construction. Prognosis of market volume for each country on the basis of market drivers, national legislations and technical and operational trends.

The Market for Mechanical Biological Treatment Plants in Europe 2011/2012

Analysis of the European market for mechanical biological waste treatment plants. Description of more than 330 plants in Europe including technical and operational data on a domestic market basis. Prognosis of market volume for each country on the basis of market drivers, national legislations and technical and operational trends.

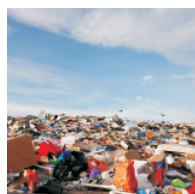

The Market for Metal Recycling in Europe

Analysis of the European market for metal recycling. Survey of essential structural data concerning the metal recycling branch. Description of more than 300 shredder plants including technical and operational data on a domestic market basis. Appraisal of market development, currently and in the future, on the basis of European legislations and technical and economic trends.

The Market for Household Waste Management in Germany

Analysis of the waste management in Germany. Detailed data and maps on more than 2,500 contracts for household waste in the segments residual waste, organic waste, paper, and lightweight packaging, including a list of more than 600 upcoming placings within the next 5 years. Overview of waste amounts and detailed information on all 120 waste incineration and mechanical-biological treatment plants including operators and market shares.

The Market for Municipal Waste Management in Italy

Analysis of the waste management in Italy. Identification of more than 800 contracting authorities for the collection and disposal of municipal waste, waste amounts, waste incineration and mechanical-biological treatment plants, including information on planned plants. Overview of market share, privatisation, concentration, investment needs and regions with increased need for action.

The Market for Municipal Waste Management in the UK

Analysis of the waste management in the UK. Description and summary of 700 contracts for household waste collection, treatment and disposal, waste amounts, waste incineration and mechanical-biological treatment plants including information on planned plants. Overview of market share, privatisation, concentration and investment needs.

The Market for Municipal Waste Management in China

Analysis of the state of development and investment needs in the Chinese waste management. Inquiry, analysis and presentation of the responsible institutions for waste administration, collection and disposal in the 100 largest Chinese cities, including essential information on waste amounts and waste fees. Description of more than 120 known investment projects and the analysis of the most important waste disposal companies.

Water Industry

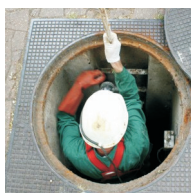

The Market for Waste Water Treatment Plants in Europe

Analysis of the European market for municipal wastewater treatment plants. Particulars for 2,400 wastewater treatment plants with a capacity of at least 50,000 inhabitant values, including operators, capacities, purifying capacity, type of purification. Nationwide appraisal of market volumes based on political, economical, operational and technological trends in municipal wastewater treatment.

Market Study Industrial Sewage Plants in Germany

Analysis of the German roadmap on operators in the industrial waste water treatment. Analysis of economic, managerial and technical trends in operating industrial sewage plants in Germany. Description of the almost 400 industrial sewage plants in Germany, including essential technical data, like capacities, industry sector, treatment technology and contact addresses.

The Market for Waste Water Disposal in Germany

Analysis of the German operator and plant market in the segment of waste water disposal. Particulars for more than 500 operators of sewerage systems in cities and municipalities with more than 25,000 inhabitants. Detailed information on almost 600 waste water treatment plants with a capacity of at least 50,000 population equivalents. Estimation of current and future investments and privatisations, based on political, demographical, managerial and technical trends.

ecoprogram is a consulting firm specialised in the environmental and energy technology markets.
